IMAGINE

Integrating MAGnetic Imaging with rich pheNotypE

20
Participants

2,400
Minutes of fMRI Imaging

GENESIS

GENerating NEw inSights into genetic Signatures

MILK

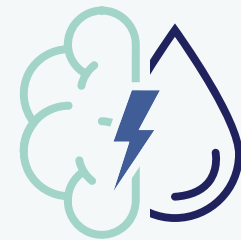

Will look at the mother-child relationship to see what happens to the breast milk of a mother who meditates.

5
Gene Targets

MYSTIC

Mind Yielding Signals Transforming Internal Components

The goal is to independently analyze the brain's electrical activity and determine if specific activities relate to specific changes in factors in the blood, and ultimate disease modulation in the laboratory setting.
